BUSINESS INSIGHTS REPORT

Sales Analysis | Prepared using the cleaned dataset

1. Introduction

The purpose of this report is to understand how the business is performing across sales, profit, products, regions and customer groups. I used the cleaned dataset supplied for this assignment and analysed the main measures in Excel-style summaries before presenting the results in the Power BI dashboard. The report focuses on what the numbers show and where the business could look more closely.

2. Overall Performance

The dataset contains 51,271 rows. It includes 25,029 distinct orders and 795 distinct customer names. Total sales are $7,831,392.00 and total profit is $1,467,497.61. This gives an overall profit margin of 18.74%. The average discount across the dataset rows is 14.29%. Average sales per order are $312.89.

Measure	Result	Measure	Result
Total Sales	$7,831,392.00	**Total Profit**	$1,467,497.61
Distinct Orders	25,029	**Customers**	795
Average Discount	14.29%	**Profit Margin**	18.74%

3. Sales by Region and Market

Central is the highest-selling region in the dataset, with sales of $1,805,979.00. Among the markets, APAC has the highest sales at $1,999,642.00. These results show where most sales are currently coming from. It is still important to compare profit as well, because a high sales total does not always mean that the area is the most profitable.

Regional Sales Summary

Name	Sales	Profit	Orders
Central	$1,805,979.00	$311,513.19	5,248
South	$1,030,741.00	$140,238.13	3,269
North	$790,475.00	$194,598.36	2,355
Oceania	$625,014.00	$121,511.49	1,743
EMEA	$575,434.00	$43,796.87	2,461
Africa	$537,684.00	$88,838.85	2,231
Southeast Asia	$531,436.00	$17,624.92	1,517

Market Sales Summary

Name	Sales	Profit	Orders
APAC	$1,999,642.00	$436,991.31	5,436
EU	$1,802,126.00	$372,850.61	4,591
LATAM	$1,562,358.00	$221,294.03	5,137

Name	Sales	Profit	Orders
US	$1,303,834.00	$285,974.55	5,009
EMEA	$575,434.00	$43,796.87	2,461
Africa	$537,684.00	$88,838.85	2,231
Canada	$50,314.00	$17,751.39	201

4. Product and Customer Analysis

Office Supplies is the category with the highest sales ($2,789,404.00). Consumer is the leading customer segment by sales ($4,056,397.00). When profit is compared by sub-category, Copiers records the highest total profit. The month with the highest sales is 2014-11, with $348,457.00 in sales.

Category Performance

Name	Sales	Profit	Orders
Office Supplies	$2,789,404.00	$518,172.58	19,002
Technology	$2,636,549.00	$663,200.15	8,351
Furniture	$2,405,439.00	$286,124.88	8,189

Customer Segment Performance

Name	Sales	Profit	Orders
Consumer	$4,056,397.00	$748,246.07	13,101
Corporate	$2,367,407.00	$442,089.20	7,670
Home Office	$1,407,588.00	$277,162.34	4,686

Top 10 Products by Sales

Product	Sales
Eldon File Cart, Single Width	$31,319.00
Rogers File Cart, Single Width	$22,645.00
Tenex File Cart, Single Width	$20,778.00
Smead File Cart, Single Width	$20,775.00
Office Star Executive Leather Armchair, Adjustable	$19,355.00
Fellowes Lockers, Industrial	$19,172.00
Smead Lockers, Industrial	$18,648.00
Hewlett Copy Machine, Color	$16,849.00
Rogers Lockers, Blue	$16,494.00
Fellowes Lockers, Wire Frame	$16,470.00

Top 10 Customers by Sales

Customer	Sales
Eric Murdock	$19,489.00
John Grady	$19,483.00
Maria Etezadi	$18,237.00
Theone Pippenger	$17,416.00
Dan Reichenbach	$16,705.00
Ben Ferrer	$16,661.00

Customer	Sales
Randy Bradley	$16,399.00
Mathew Reese	$16,125.00
Steven Ward	$15,984.00
Paul Gonzalez	$15,922.00

5. Key Findings

• Sales are concentrated in a few leading regions and markets, with Central and APAC ranking first in their respective groups.
• Office Supplies contributes the highest category sales, while Consumer is the largest segment by sales.
• The highest-profit sub-category is Copiers. This is useful when deciding which product groups deserve closer attention.
• The strongest sales month is 2014-11. This may be worth comparing with other years before making seasonal decisions.

6. Recommendations

1. Review sales and profit together for each region and market. Focus on areas where sales are high but profit is comparatively low.
2. Check discount levels by category and sub-category. This can help identify products where discounts may be reducing profit too much.
3. Study the leading products and customer groups to understand what is driving sales. Use this information when planning promotions and stock levels.
4. Compare monthly sales across years to check whether the peak month is a regular seasonal pattern or a one-time increase.
5. Keep monitoring profit margin along with total sales so that business decisions support profitable growth, not only higher revenue.

7. Dashboard Overview

The Power BI report has three pages: Executive Overview, Sales Analysis, and Product & Customer Insights. The pages are designed to show the main KPIs, sales trends, regional performance, category results, and leading products and customers. Region, Market and Category slicers are included to let the viewer filter the report. The date slicer should also be included if it is part of the final submitted dashboard.

8. Conclusion

Overall, the dataset shows a clear picture of sales, profit and customer activity across different parts of the business. The main takeaway is to use both sales and profit when reviewing performance. The findings in this report can be used as a starting point for further investigation and for discussing practical improvements with the business team.

Note: Values in this report are calculated from the supplied cleaned dataset. Sales and profit are displayed in the dataset's dollar convention.
